Reinvent & Rethink Agile

We focus on providing
business's an approach
that aligns to
development and
meeting goals.

agilefolklore

ABOUT US

At "agilefolklore", we believe strongly in the value that Agile delivers. Agile can be associated only with a transformation and not transition.

"agilefolklore" helps you build a transformation strategy which respects where you are today while laying the foundation for where you need to be in the future.
We value,
Collaboration over Prescription: We do not believe in sticking out to one framework, one solution and rigid process. We do not believe in providing one solution to all our clients. Every client in unique and we believe solutions catered need to be so too. At ""agilefolklore"", we create a synergy with our clients to identify challenges and recommend solutions that are tested collaboratively before incorporating change across the organization.

Pragmatism over Ideals: We build frameworks that are more pragmatic. Our central focal point revolves around ensuring that our clients propel towards positive change and sustain the same.

Principles over Practices: There is a mark difference in "Doing Agile" and "Being Agile". We understand the importance of procedures. But we also strongly believe, holding on to a procedure only leads to framework compliance and not necessarily Agility. By placing increased importance on principles, we close gaps.

Mindset over Methodology: By approaching Agile less as a methodology and more as a collection of values and principles we help you build an engaged and empowered team fostering an environment that promotes collaboration and innovation resulting in value generation.

WHY ARE WE DIFFERENT

We start by evaluating what your company values from a planning perspective. Most companies struggle to balance the need for predictability with the need to rapidly respond to change. It's not so much about how predictable you are, it's more about how predictable you are trying to be.

We are dedicated to helping organizations achieve better business outcomes through the systematic application of agile delivery methods across the entire enterprise.

Our company is primarily focused on the transition patterns and intermediate states necessary to safely and pragmatically lead any company through a structured and planned transformation event.

We are committed to engaging in a way that respects where each company is today, while laying a foundation for where it needs to be in the future. "agilefolklore" takes the magic out of agile transformation.

We build projects around motivated individuals. Give them the environment and support they need, and trust them to get the job done.

We don't build frameworks. We believe that a single approach can not suit all. We customize and are guided by the Agile manifesto, Agile principles rather than frameworks. We work closely with our clients to understand their goals, their identify, their challenges and only then we co-create an approach in collaboration.

We foster an environment that promotes collaboration and working side by side we create an innovative approach driven by leaders urging and continuing to incorporate agile values to the existing organization culture. We define an acceptance criteria and don't consider the story done until that acceptance criteria passes.

OUR FRAMEWORK

Visualize

- Make the current work visible

Edify

- Training on the identified frameworks

Observe

- Take a step back and closely monitor

Explore

- Closely observe the work and question the basis.

Facilitate

- Help implement the learning – Walk the Talk

Intercede

- We assist in implementation and continuity to keep the process going and pitch in when the need arises to streamline the process or fill in the gaps.
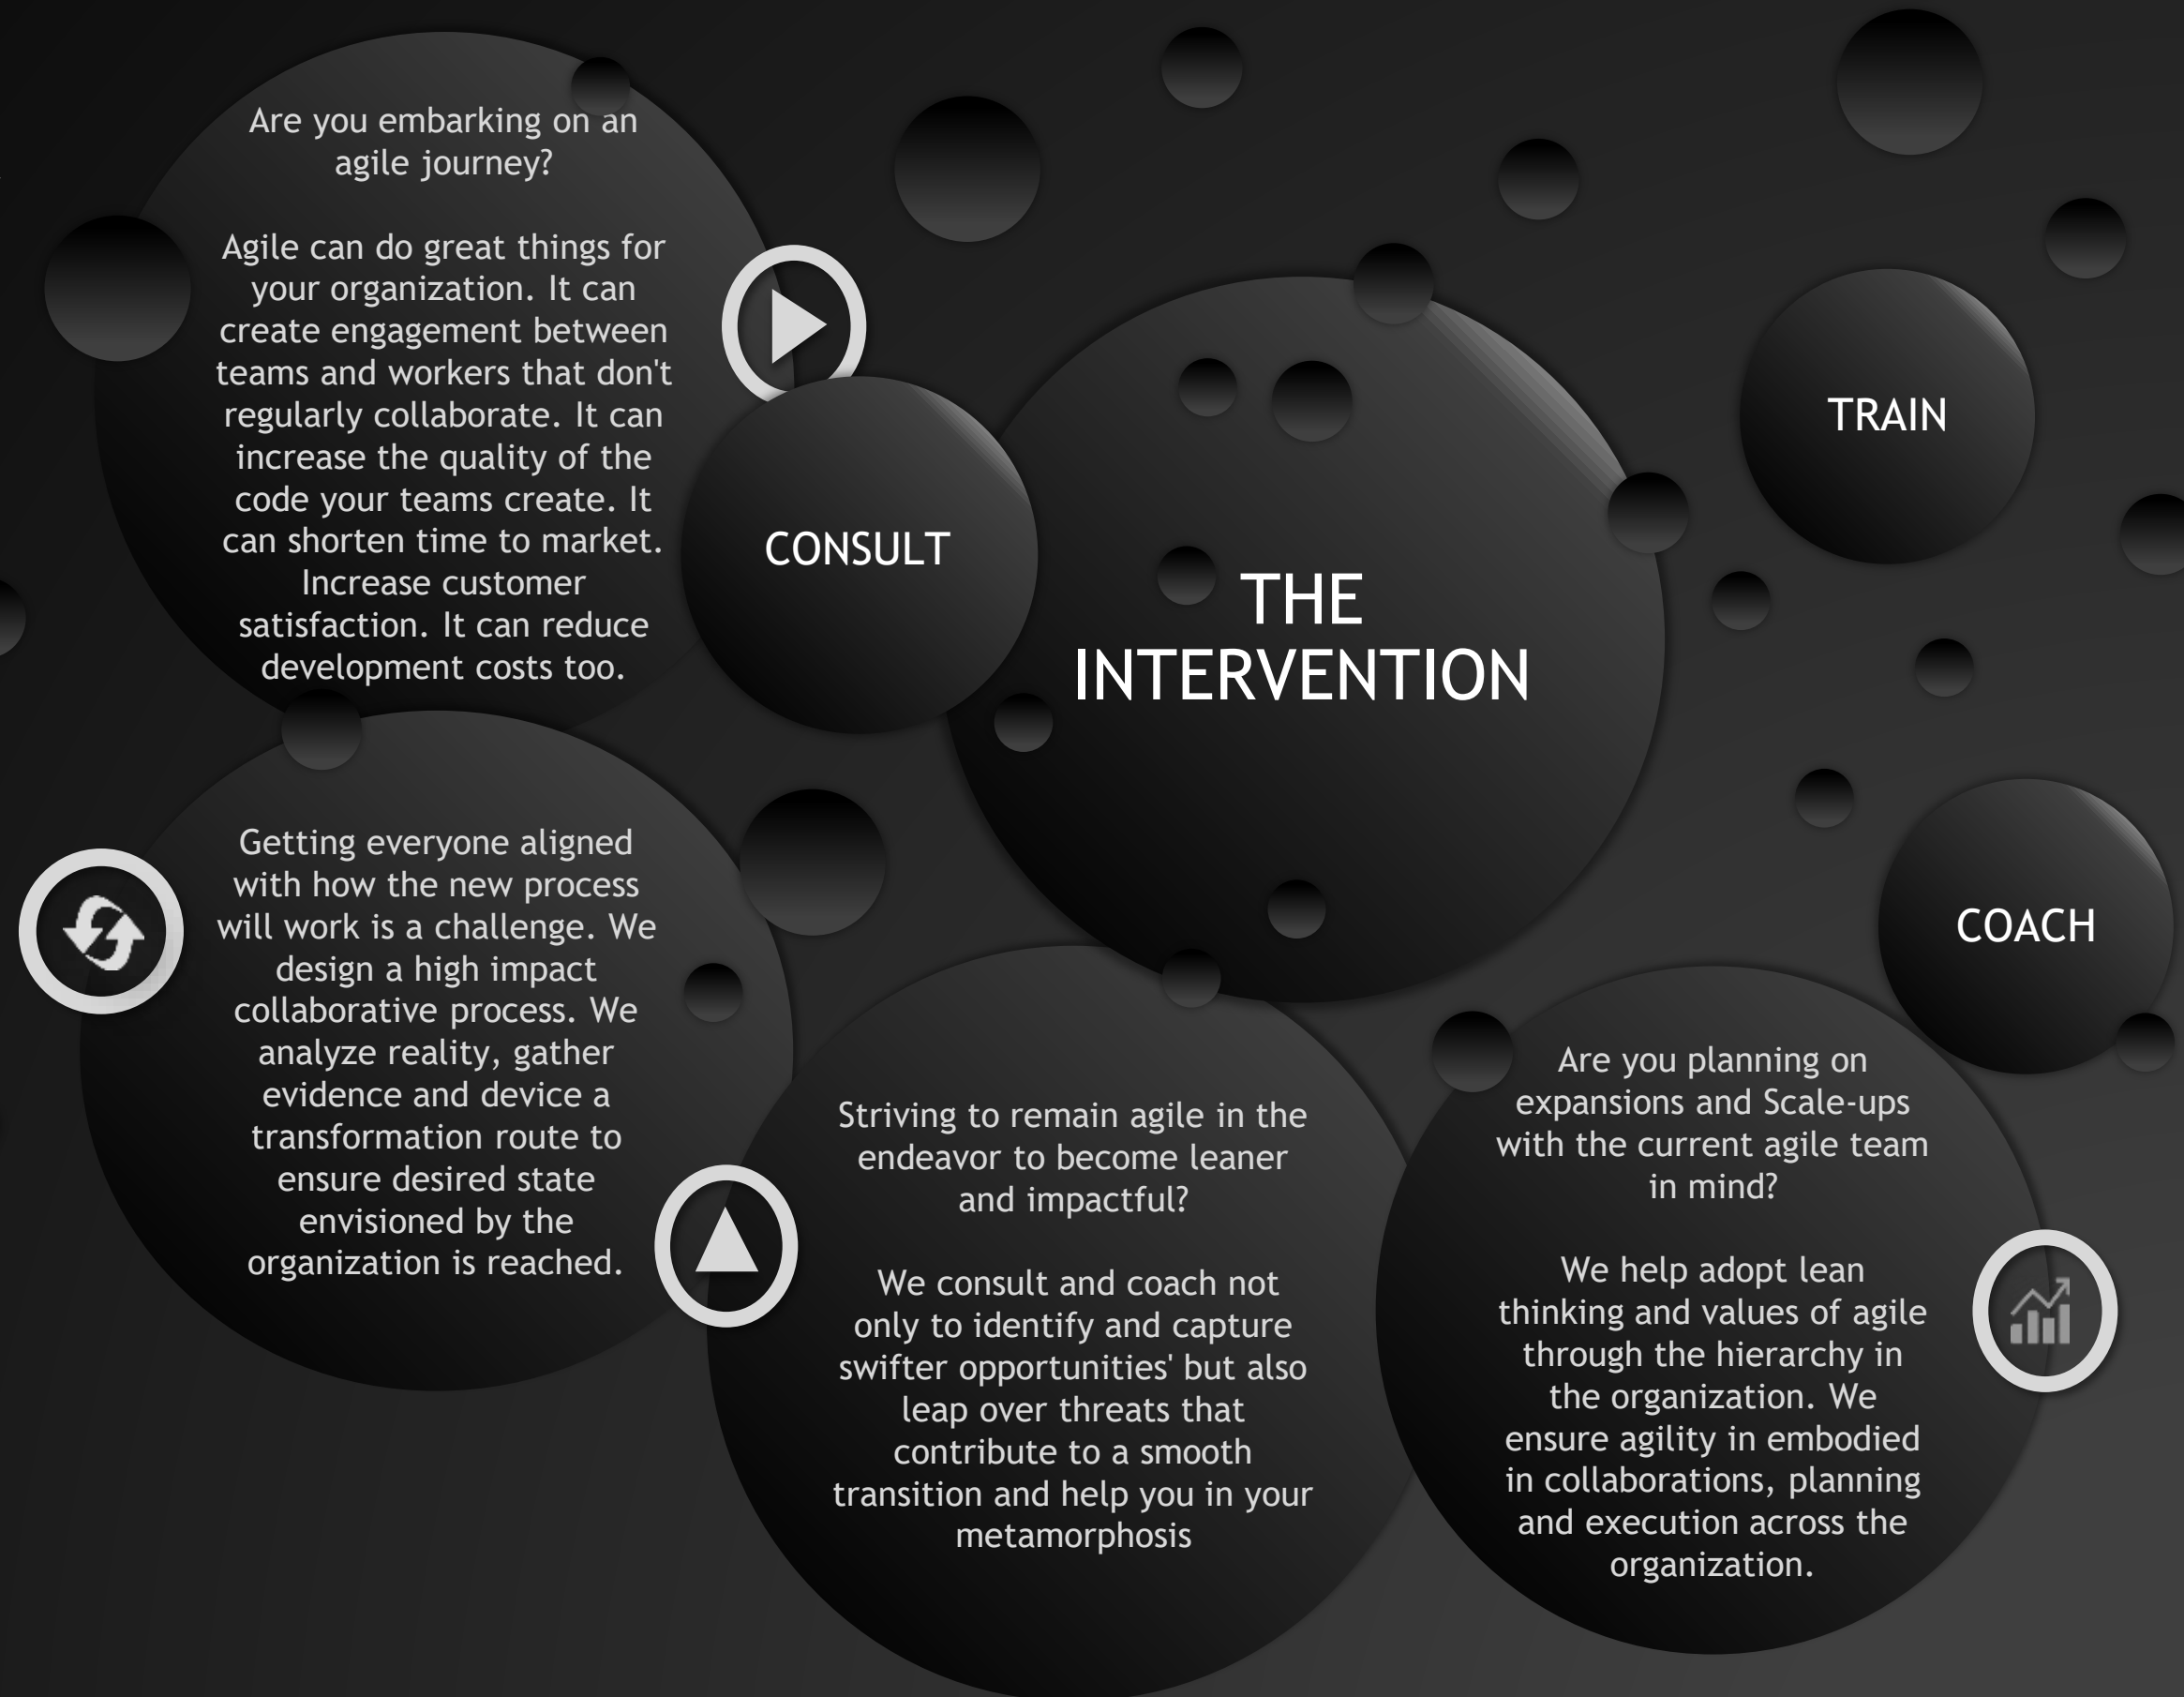

We understand, we know, we realize that change cannot be forced. It is way beyond belief now. We help teams visualize the future (the desired state), their role in creating it and help them achieve it.

A level of engagement ranging from consultation we provide Agile enhancement strategies, Agile project management, and Agile coaching and role mentoring across all enterprise levels, to fit your needs.

Agile Transformation strategies targeting both process optimization and people. Team empowerment, conflict navigation, and agile training work with improved business processes to encourage the organic growth of an iterative, incremental and collaborative development process.

Structured transformation processes with no framework bias help your team adhere to Agile best practices, maximize ROI and team adoption success, and avoid transitional pitfalls.

We help teams understand the WHY behind the identified framework and HOW it leads them to deliver customer value.

THE INTERVENTION

CONSULT

Are you embarking on an agile journey?

Agile can do great things for your organization. It can create engagement between teams and workers that don't regularly collaborate. It can increase the quality of the code your teams create. It can shorten time to market. Increase customer satisfaction. It can reduce development costs too.

Getting everyone aligned with how the new process will work is a challenge. We design a high impact collaborative process. We analyze reality, gather evidence and device a transformation route to ensure desired state envisioned by the organization is reached.

Striving to remain agile in the endeavor to become leaner and impactful?

We consult and coach not only to identify and capture swifter opportunities' but also leap over threats that contribute to a smooth transition and help you in your metamorphosis

TRAIN

COACH

Are you planning on expansions and Scale-ups with the current agile team in mind?

We help adopt lean thinking and values of agile through the hierarchy in the organization. We ensure agility in embodied in collaborations, planning and execution across the organization.

Getting started with "agilefolklore" is quick and easy. We try to keep everything risk free and as easy as possible. We are willing to invest our time to earn your trust. The process starts with a quick phone call to determine how we can help. We would love to learn more about your company and explore our approach in greater depth.
